ScaleVault

A full service all-in-one storage solution which provides **local onsite backup** and **off-site cloud backup** for **physical hosts** including servers, desktops, and laptops. In addition, ScaleVault enables **enterprise-class file sync and share** (EFSS), **mobile device management**, and **data governance controls** for businesses of any size.

ADVANTAGES AND VALUE OF SCALEVAULT

- **Cost effective** with consolidation of storage, backup, NAS, cloud sync, and mobile access into a single enterprise-class solution.
- **End-to-end security** using AES-256 data encryption coupled with password protection.
- Backup locally and to the cloud with **fast local recovery** and **off-site redundancy** for 24/7/365 data protection.
- **Easily access** your ScaleVault appliance and cloud files anywhere using a web browser.
- **File Sync & Share** provides secure, fully behind-the-firewall alternative to unsanctioned cloud file sharing services.
- **Save costs** on IT overhead, software and hardware.
- Add capacity **on demand** whenever you need it.
- **White glove support** available 24 hours a day.

FEATURES OF SCALEVAULT

- **Local backup** for servers, laptops, desktops, and mobile devices for your entire business.
- **Share and manage files** locally with built-in NAS functionality replacing or augmenting file servers.
- Sized to fit the **technical and budget requirements** of your business; startups from one to hundreds of end users.
- **Integrates** with identity management systems.
- Access and share files **anywhere** with easy-to-use apps for iOS, Android, Windows, Mac and Linux.
- **Multi-folder sync** for local access across all of your devices.
- **Shared workspaces** for teams with no file size or bandwidth limits.
- Highly efficient **integrated backup** from a single client.
- Reduce WAN traffic with source-based **global de-duplication**.
